Mr. Sakol Sukwanichwchai, (proxy from the Thai Investors Association)
About the company's plan to handle contracted sales amounts of both cars and other vehicles considering that the Covid-19 pandemic had dramatically halted the entire economy, whether the company would continue to keep paying the dividend as it had done in the past or not ?

Mr. Koichi Nagano (President)
About the Covid-19 pandemic, the company had implemented various measures, resulting in no employees falling prey to the coronavirus.

Regarding the automobile business which witnessed a sharp fall of both production level and sales, as a company with production excellence, The company had revamped our internal management to cope with declining purchasing orders from our customers. We had coordinated with our supply chain to prevent the overstocking of raw materials. Unnecessary and non-urgent expenses were controlled and reduced to zero, respectively. Based on this adjustment, the company still experienced certain losses but we continued monitoring customer information.

The company had tried to readjust activities in various areas as previously communicated to shareholders so that we could stay profitable and continue to return it to shareholders in a form of dividend. Meanwhile, the company begged for collaboration and support from shareholders as well.

Mr. Sakol Sukwanichwchai (proxy from the Thai Investors Association)
1. About Vietnam being a production base and inquired whether automobile companies were inclined to move their production from Thailand to Vietnam since Thailand was entering an ageing society while Vietnam continued to experience a robust economic growth?

Mr. Paisan Wuthibanchon (Shareholder)
2. About the relocation of production base of automobile companies to Vietnam and how GM Thailand's business withdrawal from Thailand by handing over its business to China's Great Wall Motors would affect The company?

Mr. Apichart Lee-issaranukul
It was true that Vietnam, being an emerging economy, had enjoyed a robust

economic growth and thereby it was possible for automakers (both automobiles and motorcycles) to gradually open their plants there. Being an emerging economy with younger population was a ground for strong and vibrant growth.

Thailand however continued to command strength as the production base for domestic sales and worldwide export. The country's future remained healthy and it was ready to expand export activities to more countries.

The company did not supply products to GM Thailand and therefore was not affected from its withdrawal from the Thai market. We did not have any detail about the new owner of the business. We preferred to monitor this situation, for it could turn out to be our opportunity.

Mr. Paisan Wuthibanchon
(Shareholder)

1. About the company investment

- The company's past and ongoing investment projects;
- The company's plan to invest during the next 3-5 years and for how much ?

Mr.Koichi Nagano
(President)

Within this year, we planned to debut our new lamp plant called Lamp 8. There would be two parts of productivity activity at this plant. The first part would be dedicated to the production of new products after receiving purchasing orders from customers. The second part would be dedicated to productivity improvement within the factory.

Other investments would be in machinery and equipment to accommodate new product development ordered by customers. This investment was intended to prevent any overcapacity production that could incur as well as to accommodate future production.

2. Whether the incoming trend of electric vehicle (EV) would become the company's long-term risk?
3. About the company's potential opportunity to expand business in the future?

Mr.Apichart Lee-issaranukul
(Executive Chairman)

1.At the moment, no one could predict the bottom of the production level yet. Of the entire production activity, half was catered for local markets while the other half was destined for export. The company believed that the situation of Covid-19 outbreak in Thailand would improve thanks to the expertise of our healthcare professionals. However, what was happening overseas was not at the bottom yet and therefore was very difficult to anticipate. The only answer was that we had to wait and see.

2.The EV was in everyone's lip for a long time and the trend was increasingly clear these days both in the form of EV (Electric Vehicle) and PHEV (Plug-in Hybrid Electric Vehicle). Regarding possible impacts to us, as an auto lamp manufacturer, we felt that if EVs had to have lamps, it remained our opportunity.

3.For future expansion, I wished to refer to President Nagano's previous answer.

With no further question from shareholders, The Chairman considered that the Meeting had acknowledged this agenda.

Agenda 3 To consider and approve the audited balance sheet and profit and loss statement for the year ended 31st March 2020.

The Chairman proposed the Meeting to consider and approve the audited balance sheet and profit and loss statement of the company for the year ended 31st March 2020, which was sent to the shareholders together with the Notice and show the importance data by video presentation as follow:

The Chairman opened the floor for shareholders' questions and made clarifications to issues submitted earlier by shareholders, which are summarized in relation to this agenda as follows.

Mr. Weerasak Sereewattanapong,
(Shareholder)

If The company would be able to maintain its profit in 2020 considering that the company's 2019 performance was excellent both in terms of sales and profit?

Mr. Apichart Lee-issaranukul
(Executive Chairman)

That based on what President Nagano had earlier explained the company's direction to solve problems, The company would do our best. However, as the world was witnessing a global slump and Thailand itself saw sharply negative figures of both production and sales amounts earlier this year, it would be very difficult to perform as excellent as last year. Yet, the company promised to do our best.

No other question being raised, the chairman, then, requested the Meeting to consider.
